

*“Our drive and desire for your project’s success makes Penta Communications your best solution.”*

---

## UNDERGROUND

Many of the projects that we do involve underground construction for the design of communication information transfer along optic fibers.

Penta is responsible for millions of feet of inner duct and rigid pipe for the future placement route of fiber optics. We construct unobstructed pipe runs, creating complex diverse routes. Our senior operators handle heavy equipment, and have the experience of placing millions of feet of inner duct in our greater metro area.

This is when experience is crucial to the success of your project. In a great deal of underground construction projects, timing is everything.

*We do it right, **the first time, faster.***
